

# Restoring Landscape Function Bootcamp

22–24 May  
2024

## Bass Coast Landcare Network presents Restoring landscape function on your farm

Learn how to apply simple strategies to improve productivity and drought resilience. Optimise water cycling and landscape function.

**Day 1:** Introduction to restoring landscape function. Learn how to read water processes to interpret landscape health. Day 1 registrations are available.

**Days 2&3:** A skills-based course about harnessing the water cycle to improve landscape function on your property. See first-hand how these solutions can work with your goals.

This **Communities of Practice Project** supports the adoption of natural infrastructure and farming system solutions for drought resilience. Bootcamp is Stage 1 with a Mentoring Program and Project Day (Stages 2 & 3) coming later in 2024. This is a heavily subsidised grant-funded program is worth \$5,000 per person!

**Mulloon Institute** is a leading research and education organisation helping to build resilient regional communities by supporting the long-term, sustainable growth of Australian agriculture.
